PROFESSIONAL SUMMARY

Senior Fullstack Developer with **7+ years of professional experience** architecting high-throughput web platforms, scalable microservices, and reactive SaaS systems. Currently building Way.com's enterprise **Carwash SaaS platform** utilizing **Angular (v17/v18)** and **Node.js**. Proven engineering leadership directing cross-functional squads of **12+ developers** at IBIL Solutions across enterprise InsurTech (Sypher), video commerce marketplaces, and Next.js applications, driving **25%+ page speed gains**, establishing automated CI/CD pipelines, and integrating enterprise payment rails (CyberSource, Stripe) and low-latency video streaming pipelines (Wowza).

TECHNICAL SKILLS

Languages & Frameworks:	Angular (v17/v18), Next.js (App & Pages Router), React.js, TypeScript, JavaScript (ES6+), Node.js, Express.js, PHP/Laravel, RxJS, HTML5, CSS3, SCSS
Architecture & State:	Microservices Architecture, Redux Toolkit, Context API, RESTful APIs, WebSockets (Socket.io), SSR/SSG/ISR, Event-Driven Pipelines
Databases & Caching:	PostgreSQL, MongoDB, MySQL, Redis Distributed Caching, AWS S3
Cloud, DevOps & Tools:	AWS (Lambda, API Gateway, S3, Cognito), Docker, GitHub Actions (CI/CD Pipelines), Terraform, Vercel, Git, JIRA, Postman, Webpack, Agile/Scrum
Integrations & Specialized:	A-PLUS Property API, Stripe, CyberSource, Wowza Live Streaming, Video.js, Joyfill Form Builder, Avalara Tax, GoShippo, HIPAA Compliance

PROFESSIONAL EXPERIENCE

Way.com Carwash SaaS Product Kerala, India / Remote
Senior Software Developer July 2026 – Present

- Engineering Way.com's flagship **Carwash SaaS platform**, powering customer subscription passes, slot scheduling, merchant partner management, and contactless QR redemptions across hundreds of US locations.
- Architecting reactive front-end modules, merchant administration portals, and state management using **Angular (v17/v18)**, **TypeScript**, and **RxJS**.
- Developing scalable backend microservices and RESTful API endpoints with **Node.js** to power real-time carwash booking, pass activations, and barcode/QR redemptions.
- Integrating third-party POS hardware systems, merchant validation APIs, and payment rails for automated wash validations across partner carwash operators.

IBIL Solutions Squad Lead (12 Developers) Kerala, India
Senior Software Developer & Engineering Lead Feb 2020 – July 2026

- Directed a cross-functional squad of **12 software developers** delivering high-visibility Next.js enterprise applications, ensuring strict alignment with business goals, architectural guidelines, and delivery milestones.
- Spearheaded frontend architecture for **Sypher — Insurance Platform**, engineering complex property underwriting, applicant, and quoting workflows in **React.js**, **Next.js**, and **TypeScript**; integrated **A-PLUS Property API** for prior-loss history and **AWS serverless** APIs (Lambda, Cognito, S3, Secrets Manager).
- Architected Next.js SSR/SSG platforms achieving **25%+ page speed gains**, configured automated CI/CD deployment pipelines using **GitHub Actions**, and built reusable TypeScript component libraries.
- Integrated enterprise FinTech payment rails (**CyberSource**, **Stripe**), **Avalara** automated retail tax calculation, **GoShippo** shipping, and **Wowza Streaming Engine** video pipelines; conducted code reviews and mentored 12 engineers in Agile/Scrum.

PROFESSIONAL EXPERIENCE (Continued)

Cankado India Pvt Ltd Digital Health & Oncology

Kerala, India

WordPress & Frontend Developer

August 2019 – January 2020

- Built responsive web pages and digital health user interfaces for oncology patients and healthcare providers using WordPress, HTML5, CSS3, JavaScript, and PHP.
- Integrated **Stripe payment gateway** into clinical web applications for secure, streamlined patient billing and transaction processing.
- Designed custom page layouts and developed custom PHP/JS plugins to extend Elementor functionality for medical oncology requirements.
- Integrated electronic Patient-Reported Outcomes (ePRO) tools, enabling patients to document health status in real time.

KEY PRODUCTION PLATFORMS & ARCHITECTURAL PROJECTS

Way.com – Carwash SaaS Platform Angular 17/18, Node.js, RxJS, PostgreSQL, Microservices, POS Integrations

Enterprise vehicle care SaaS platform facilitating customer subscription passes, partner merchant portals, slot scheduling, and contactless QR/barcode redemptions across hundreds of US partner locations. Engineered high-throughput booking microservices and POS validation workflows with automated billing reconciliation.

Sypher – Insurance Underwriting Platform

React.js, Next.js, TypeScript, AWS (Lambda, API Gateway, S3, Cognito), A-PLUS Property API

Enterprise property insurance underwriting and quoting platform supporting multi-step property, applicant, and risk workflows. Integrated external insurance services including the A-PLUS Property API for loss history, connected frontend applications to AWS serverless APIs, and built reusable TypeScript component libraries.

Video Social Marketplace Next.js, Node.js, Wowza Live Streaming, CyberSource, Avalara, GoShippo

High-concurrency video social and commerce platform enabling creators to monetize live streams, channel memberships, CyberSource credit checkouts, and real-time sales tax calculation via Avalara. Directed frontend engineering squad implementing custom Video.js controls, WebSockets chat streams, and carrier label shipping automation.

Contract Q – Builder & Contractor Platform Next.js, TypeScript, Joyfill Form Builder, Tailwind CSS

Enterprise job assignment, field tracking, and dynamic customer estimation form builder system with real-time state synchronization and multi-tenant access control. Built interactive schema-driven estimation forms with Joyfill streamlining contract drafting for commercial contractors.

HASHAPP – Crypto-Social Engagement Network Next.js, TypeScript, Node.js, Stripe, Socket.io, Video.js

Blockchain engagement platform rewarding member interaction with micropayments, interactive media feeds, and Stripe checkout subscriptions. Built responsive media feed with custom Video.js player, Socket.io instant messaging, and dark mode.

Intellicp Pharmacovigilance & CANKADO Health React.js, MongoDB, HIPAA Compliance, ePRO Systems

HIPAA-standard adverse event extraction tool compiling automated ICSR safety reports from medical source documents, and accessible patient-reported symptom tracking interfaces for clinical oncology studies.

ARCHITECTURAL COMPETENCIES & TECHNICAL LEADERSHIP

Frontend Architecture & Performance: Deep mastery of Next.js (App & Pages Router SSR/SSG/ISR) and Angular (v17/v18 with RxJS). Implemented code splitting, selective hydration, on-demand cache revalidation, and CDN optimization boosting page speed by 25%+.

High-Throughput Microservices & APIs: Engineered resilient Node.js microservices, RESTful APIs, and real-time Socket.io WebSockets event pipelines powering instantaneous notification streams, booking queues, and POS hardware barcode validations.

FinTech, InsurTech & Tax Integrations: Architected multi-gateway payment processing with Stripe and CyberSource, automated jurisdictional retail tax calculations via Avalara, insurance loss retrieval via A-PLUS Property API, and dynamic schema forms with Joyfill.

Engineering Squad Direction & DevOps: Directed squads of 12+ developers at IBIL Solutions, driving sprint planning, code review standards, zero-downtime CI/CD deployment automation with GitHub Actions, and high-impact mentorship.

EDUCATION & CREDENTIALS

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2015 – 2019

APJ Abdul Kalam Technological University • Kerala, India

Core Coursework: Data Structures & Algorithms, Object-Oriented Software Engineering, Database Management Systems, Distributed Networks, Operating Systems, Web Technologies
